

## Lionshead Avenue Closed to Eastbound Traffic

This month, construction crews are wrapping up work at the intersection of Business Park Drive and Lionshead and Poinsettia avenues. Crews will open up the intersection by the Thanksgiving holiday.

Beginning in early December, Lionshead Avenue will be closed to eastbound traffic between Eagle and Business Park drives. During the closure, westbound traffic will remain open and eastbound drivers can use the Eagle Drive detour. Please see map below for details.

Once construction reaches the businesses on the south side of Lionshead Avenue, crews will close one driveway at a time to install the desalination pipeline. One driveway entrance to each building will remain open at all times to maintain full access to each business.

Work on the pipeline will be conducted between the hours of 6:30 a.m. and 5:30 p.m. The Project team will keep residents and commuters updated via the 24-hour construction hotline, website updates and additional eNews updates.

### About the Carlsbad Desalination Project

*This historic Project is the commencement of a 30-year water agreement between San Diego County Water Authority and Poseidon Resources for the purchase of 50 million gallons per day of desalinated seawater. The water will be produced at the desalination plant located adjacent to the Encina Power Station in Carlsbad and conveyed to the Water Authority's water delivery system via a 10-mile pipeline. The Carlsbad Desalination Project will provide San Diego County with a locally controlled, drought-proof supply of high-quality water that meets or exceeds all state and federal drinking water standards.*

*When completed in late 2015, the Carlsbad Desalination Plant will be the most technologically advanced and energy-efficient seawater desalination plant in the Western Hemisphere.*
